16 | Building My Product Lab | @StartupInbox, NYAS, Stick' Em |
Youth Leader

Millers Point, New South Wales, Australia

Summary

In high school and I like to build things and meet new people. Tryna
build something for women in stem and gender bias overall!##

Experience

My Product Lab

Creator & Developer

July 2025 - Present (1 year 1 month)

Independent body of work focused on designing and building digital systems
around time, productivity, and long-term personal growth, using a mix of
traditional engineering and AI-assisted development workflows.

- Designed, built, and deployed multiple interactive web applications from
concept to production
- Owned end-to-end development including UX design, frontend architecture,
and deployment
- Employed AI-assisted and “vibe-driven” coding workflows to move quickly
from intuition to functional prototypes while maintaining technical clarity
- Deployed and maintained applications on platforms such as Netlify, Vercel,
and Render
- Iterated rapidly through experimentation, feedback, and continuous
refinement

FlixTracker

Founder and Developer

July 2025 - Present (1 year 1 month)

FlixTracker is a project born out of my own need as a dedicated movie and
TV show fan who wanted a better, smarter way to keep track of what I'm
watching(like Greys Anatomy ;P). I often found myself juggling multiple
streaming platforms, forgetting where I left off in a series, or struggling to plan
my viewing time around a busy schedule. I realised there wasn't a single tool
that combined accurate runtime data, personalised schedules, and progress
tracking in a way that was both simple and visually engaging, so I decided to
make one myself.

From initial concept sketches to coding the core features, I've been through every step of bringing FlixTracker to life. The app automatically fetches precise runtime information for any TV show or movie using integrated APIs, calculates the total watch time, and even helps users plan their viewing based on how much time they have each day. It also includes a progress tracker so you can log exactly where you're up to and instantly see how much more time you need to finish.

Beyond functionality, I've worked hard to create an intuitive, clean, and user-friendly interface that makes tracking your watchlist enjoyable rather than a chore. This meant diving deep into front-end design, experimenting with layouts, and testing user flows to make sure every click feels seamless. I'm currently in the deployment phase; setting up hosting, a custom domain, and monetisation through ads; to make FlixTracker accessible to anyone who shares the same frustration I had.

This project reflects not just my technical skills in Python, Flask, Streamlit, HTML, CSS, JavaScript, and API integration, but also my passion for building meaningful tools that solve real problems. FlixTracker isn't just a coding exercise, it's a personal vision turned into a fully functional product.

The Ponds High School

2 years 2 months

Editor-in-Chief of The Gazette

August 2025 - Present (1 year)

Leading the largest high school in NSW's flagship publication, overseeing editorial direction, content quality, and production timelines. Managing an amazing team of writers, photographers, and designers, ensuring engaging, accurate, and timely issues. Will coordinate interviews, feature stories, and community coverage, while upholding journalistic standards.

Junior Creativity and Innovations Team Leader

July 2024 - Present (2 years 1 month)

As the Creativity and Innovations Team Leader, I lead a team of students focused on promoting creative thinking and innovation within the school community. I am responsible for helping organising workshops, events, and brainstorming sessions where students collaborate to develop solutions for various school challenges. In this role, I work my hardest to foster a

collaborative environment within my peers and come up with new ideas and creative problem-solving.

School Gazette Writer

June 2024 - Present (2 years 2 months)

As a Writer for the School Gazette, I collaborate with a wonderful team of writers, photographers, and designers to produce engaging and informative content for the school community. My responsibilities include researching, writing, and editing articles on various topics, such as school events, student achievements, and relevant issues impacting the student body.

InnovateX Mentor

September 2024 - June 2026 (1 year 10 months)

As an InnovateX mentor at The Ponds High School, I have the privilege of guiding Year 7 students through the transformative design thinking process. This program empowers students to collaborate in teams, tackling real-world challenges faced by our local school and broader community. By sharing my knowledge and experiences, I foster an environment where creativity and innovation thrive, encouraging students to think critically and develop essential problem-solving skills.

World Cubing Association

Member

May 2024 - Present (2 years 3 months)

As an official member of the World Cube Association (WCA), I have competed in WCA-sanctioned speedcubing competitions, participating in events such as the 3x3 and 2x2 Rubik's Cube. This experience has strengthened my problem-solving, focus, and time management skills in high-pressure, competitive environments.

StartupInbox

Head of Operations

January 2026 - June 2026 (6 months)

Stick 'Em

Ambassador For Australian Engagements

October 2025 - June 2026 (9 months)

I will represent the brand's mission to inspire creativity, innovation, and hands-on learning across young communities in Australia.

The New York Academy of Sciences

Junior Academy Researcher
August 2025 - June 2026 (11 months)

Selected to join the New York Academy of Sciences' Junior Academy, an international program that connects top students with STEM experts to tackle global challenges through research and innovation. The Junior Academy accepts only about 10% of applicants worldwide each year. I am one of 21 students across all of Australia

As a member, I will collaborate with peers from around the globe on mentored projects, develop skills in problem-solving, scientific research, and cross-cultural teamwork while contributing to solutions that address pressing issues in science, technology, and society.

LoopLess
Intern

August 2025 - January 2026 (6 months)

I have recently joined LoopLess as a Marketing Intern, where I will be working on content creation, audience engagement and campaign development.

LoopLess is a behavioural health company that helps people reduce screen time and build healthier digital habits.

I am excited to be part of a team that is rethinking the way technology fits into modern life. In this role I will be learning the ins and outs of digital marketing while contributing to projects that support LoopLess's mission of making technology work for people rather than the other way around.

Apparent
Intern

June 2025 - June 2025 (1 month)

I had the incredible opportunity to intern at Apparent Communications, an award-winning independent full-service agency based in Sydney. During this immersive week, I collaborated with fellow interns to conceptualise a marketing campaign for our favourite artist's upcoming tour. This hands-on project allowed us to apply creative strategies and gain insights into the multifaceted world of marketing.

Throughout the internship, we engaged with various departments, including Creative, Strategy, Digital, Media, and Client Services. These interactions provided a comprehensive understanding of how integrated campaigns are

developed and executed. The experience was both enlightening and inspiring, solidifying my passion for marketing and creative storytelling.

Apparent Communications boasts a diverse portfolio of clients, such as Google, IBM, Volkswagen Group Australia (including Audi, Volkswagen, Cupra, and Skoda), Tip Top Australia, Vanuatu Tourism Office, World Surf League, Rhythm Japan, Cricket Australia, and the Sydney Symphony Orchestra . Being part of an agency that collaborates with such prominent brands was truly motivating.

This internship not only enhanced my understanding of marketing dynamics but also reinforced my aspiration to contribute innovatively to the tech and creative industries.

Rotary International

Pitch for Purpose Finalist

February 2025 - March 2025 (2 months)

Pullman Sydney Penrith

In 2025, I was honoured to be selected as a finalist in the Pitch for Purpose Innovation Challenge, a feature event at the Rotary District 9685 Conference: Our Better World.

This summit brought together global thought leaders, sustainability advocates, and youth innovators to address pressing issues including environmental degradation, waste management, and climate change. The conference featured keynote speakers such as Australia's former Chief Scientist Alan Finkel and sustainability trailblazer Professor Veena Sahajwalla. It was an inspiring environment to be surrounded by changemakers and industry experts, all committed to shaping a better future.

My team, The Ponds Pride, presented our solution titled Trash to Treasure, a creative and community-driven up-cycling initiative designed to give hard-to-recycle materials a second life through art. Our vision included a statewide student competition with an annual theme where young people transform e-waste into artistic installations, showcased at high-profile public events like Vivid Sydney. We also proposed wearable art parades in schools, partnerships with organisations such as 'Upcycle That', and a funding model through the NSW Environmental Trust.

This challenge helped me develop critical 21st-century skills, design thinking, public speaking, creative problem-solving, and collaborative teamwork, while deepening my passion for environmental innovation and social impact. Presenting in front of hundreds of Rotarians, educators, and sustainability leaders was both humbling and energising.

More than just a competition, Pitch for Purpose was a platform for youth voices and real-world ideas. It taught me that meaningful change doesn't always start big, it starts with bold ideas, passionate people, and a willingness to turn today's trash into tomorrow's treasure.

UN Youth Australia

Delegate

June 2024 - June 2024 (1 month)

I got to roleplay delegates to the United Nations, simulate UN committees, and learn about diplomacy, international relations, current world issues, and the UN itself. This was a very inspiring opportunity that helped me further extend my skills into public speaking, communication, and my knowledge of the world.

YouTube

Content Creator

2022 - 2024 (2 years)

University of Technology Sydney

UTS Entrepreneurship Program (Startups Summit)

December 2023 - December 2023 (1 month)

Australia's largest event to inspire and support young tech-enabled entrepreneurs.

Tournament of Minds - Victoria

Collaborator

July 2023 - August 2023 (2 months)

Collaborated with a team of students to develop an innovative solution to an open-ended, interdisciplinary problem in STEM fields. Through several weeks of creative brainstorming, research, and strategic planning, we designed and executed a unique performance that showcased our solution to a panel of judges. This experience enhanced my skills in teamwork, critical thinking, and problem-solving, while fostering creativity and effective communication in a competitive environment.
